

Post Ian Monitoring for Invasive Reptiles

What has been done.
What should be done.

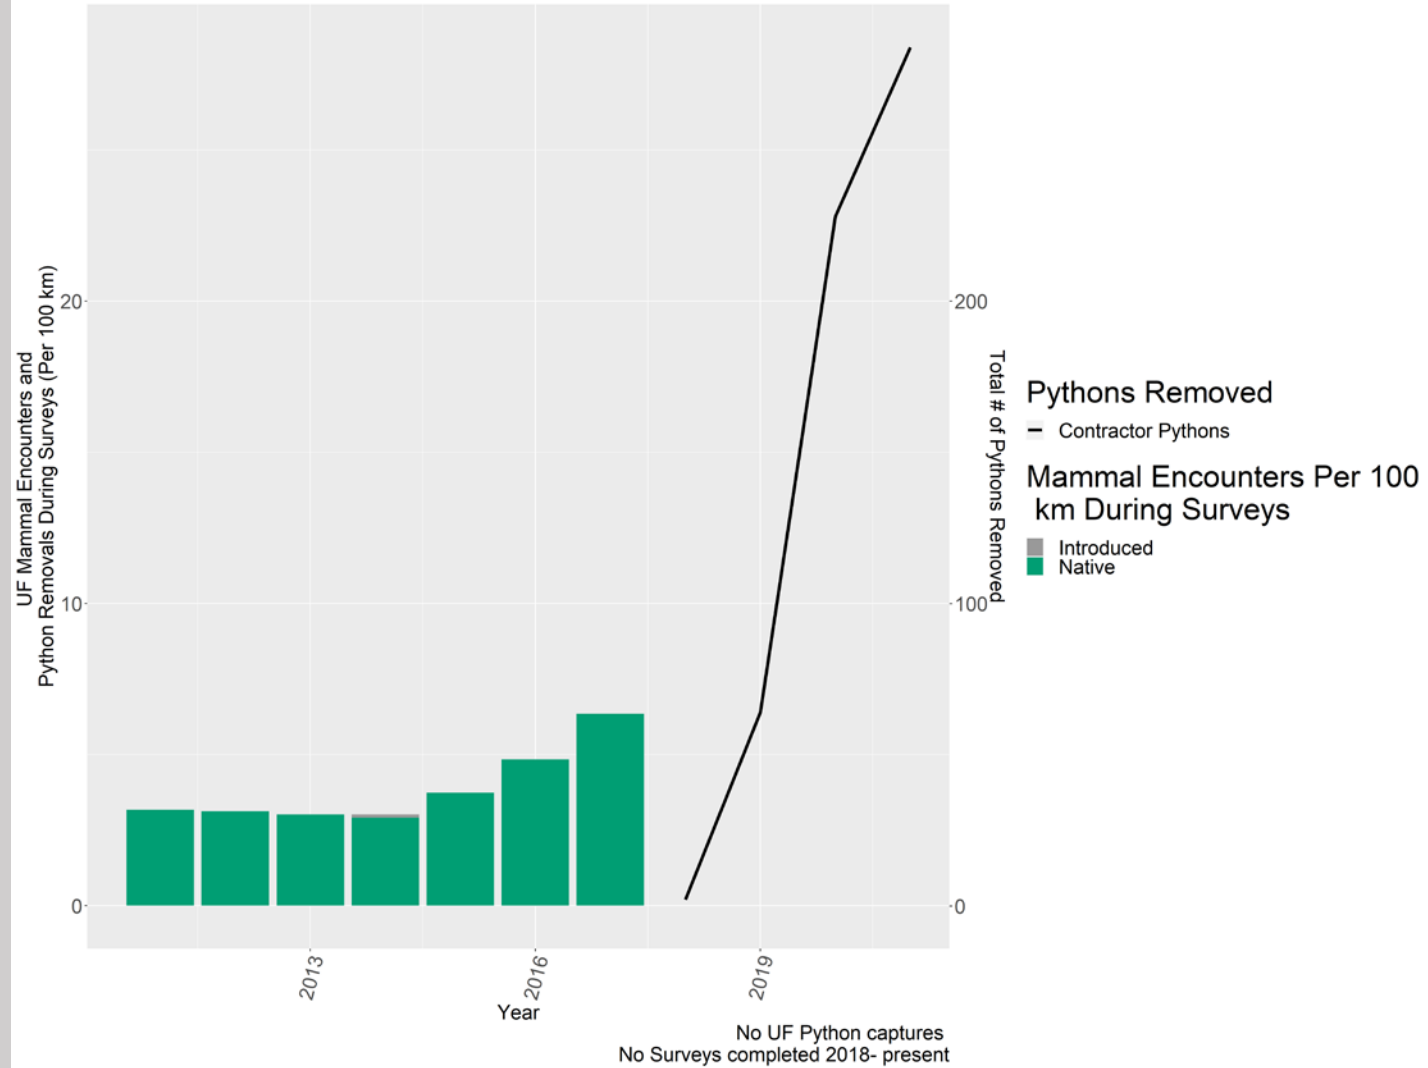

Do hurricanes release or spread invasive wildlife?

EIRAMP Surveys BICY N and S 2011 – 2017 Removal by Contractors 2017 - Present

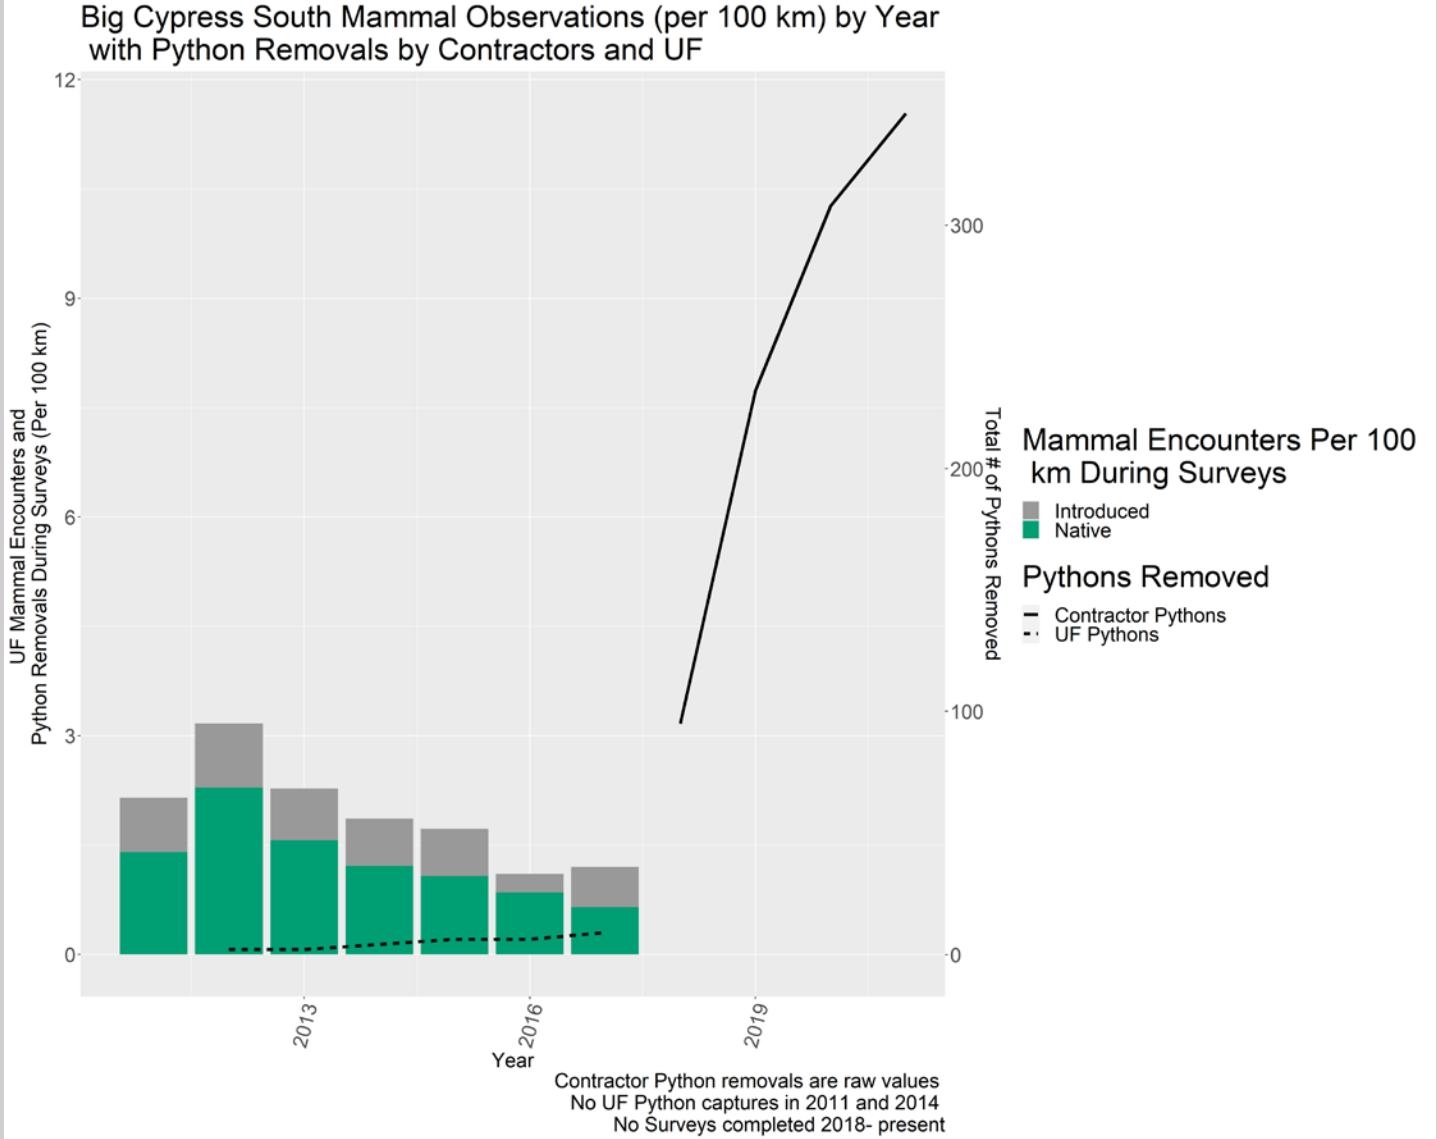

BICY N

Big Cypress North Mammal Observations (per 100 km) by Year with Python Removals by Contractors and UF

BICY S

What should be done?

- Add invasive reptiles to CEMs – done for GE in the process for SCS and SWFL
- Expand regional monitoring network throughout the CERP footprint – especially SWFL
- Multi-taxa monitoring program that is still taxa specific - focus should be on EDNR as well as established species
- **Don't forget crocodiles!**
