

# CENTRAL EVERGLADES PLANNING PROJECT | CEPP

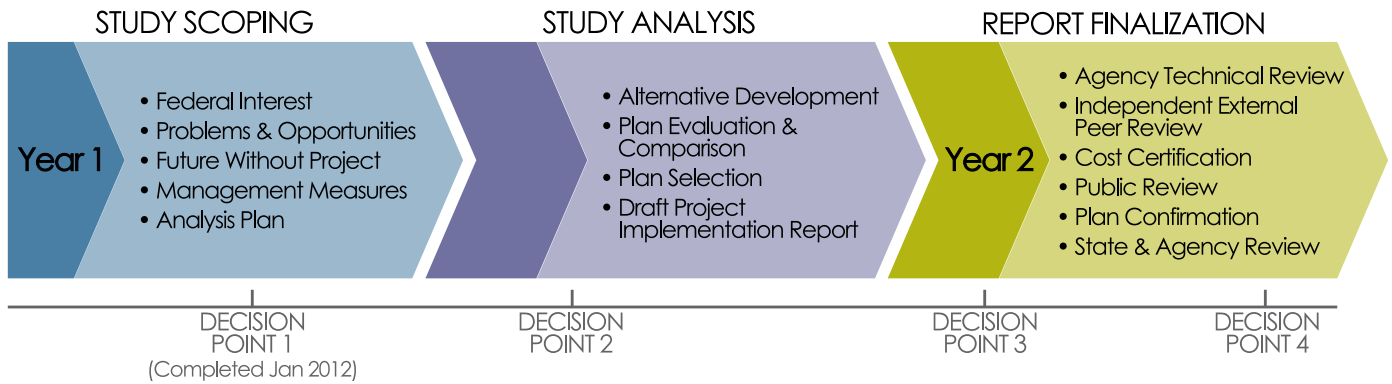

The CERP components identified to be studied as part of the Central Everglades Planning Project are: the Everglades Agricultural Area Storage Reservoir, Decentralization of Water Conservation Area 3, Everglades National Park Seepage Management and Everglades Rain Driven Operations. These components are highly interdependent features of the recommended plan that are being formulated, optimized and implemented in a comprehensive and integrated manner. They make up the heart of the CERP and will lead to the next suite of restoration projects.

## STUDY SCHEDULE

The schedule for the Central Everglades Planning Project utilizes the principles outlined in the U.S. Army Corps of Engineers' Planning Transformation Process. The project is currently in the study analysis phase.

### CENTRAL EVERGLADES STUDY PROCESS

## PROJECT DELIVERY TEAM

The USACE and SFWMD are the principal federal and non-federal sponsors for the CERP, and other environmental restoration efforts. Together, they are facilitating CERP Project Delivery Team (PDT) meetings for the Central Everglades Planning Project in parallel with public workshops sponsored by the South Florida Ecosystem Restoration Task Force's Working Group. PDT meetings enable federal, state, local agencies and tribal governments to provide input into the Central Everglades Planning Project.
